

Pro Biofill

The natural infill

Italgreen 

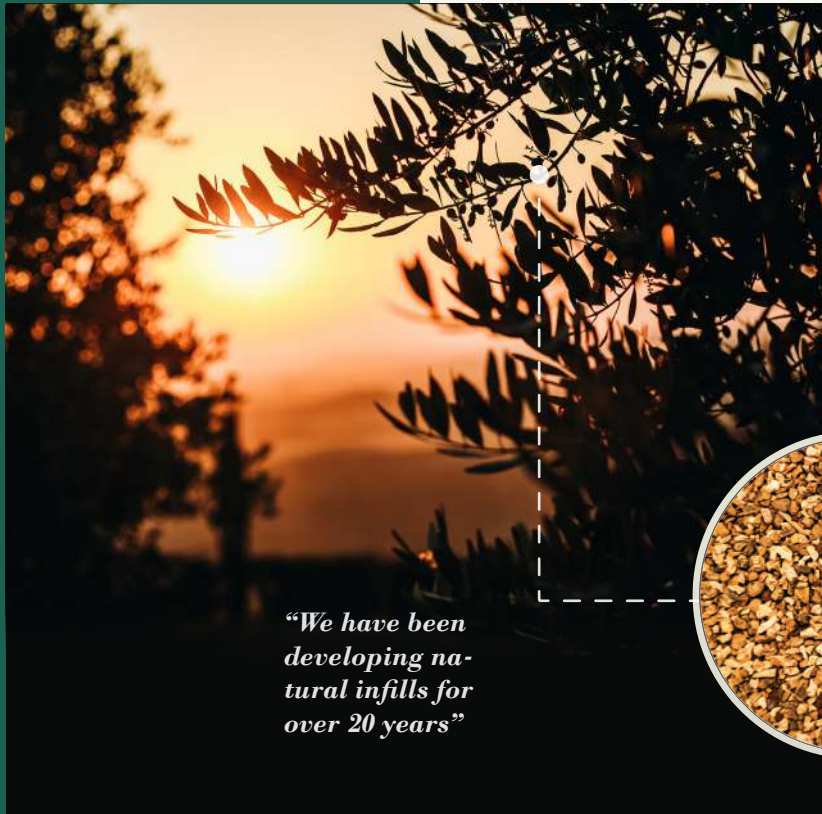

Pro Biofill

What is it and what is it for?

Pro Biofill is a next-generation **natural infill** made from plant-based granules and approved by the most important football federations.

Completely free from microplastics, it offers **performance comparable to traditional plastic infills**, whose use **will be banned** in the EU starting on September 2031.

"We have been developing natural infills for over 20 years"

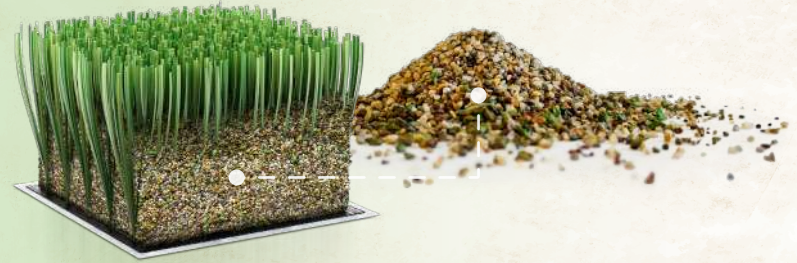

PRO BIOFILL LINE

Italgreen's Pro Biofill line consists of 100% natural infills.

Pro Biofill One

A unique infill with stabilization and performance functions, made of silica sand, olive pits granules, and cork with antistatic properties.

Ideal for small and medium size football pitches.

Pro Biofill

Performance infill made of a carefully formulated mix of olive pits granules and cork, to provide stability, drainage, and high performance.

FIFA approved.

PRO BIOFILL LINE

Italgreen's Pro Biofill line consists of 100% natural infills.

Pro Sand Bio

Stabilization infill made of 100% recycled olive pits granules.

By choosing Pro Sand Bio, we preserve the environment by avoiding sand extraction.

Thanks to its structure, it does not compact, ensuring high levels of drainage and water permeability.

THE ADVANTAGES

The Pro Biofill line offers numerous advantages over plastic infills.

Similar performance to plastic infills

Maintains performance even in freezing conditions

Eco-friendly

Same maintenance requirements as synthetic infills

Free from microplastics

Recyclable

Cool playing surface in summer

Odorless

Draining

Patented
